

The Horn Spoons.

The spoons in this picture have been made from the horns of Deer or Cattle. They are said to be made of Keratin which is the main compound found in bones and horns. They have been described as "The Horn Spoons". They are in the possession of a family member of the Sloan / McLennan family line via Jean Jordan.

They have been held in the Sloan family since some of their ancestors on the Macdonald line (*See below*) survived the Massacre of Glencoe on 13th February 1692.
