WIKIPEDIA
The Free Encyclopedia

What is WikiTree?

WikiTree is a free, shared social networking genealogy website that allows users individually to research and contribute to their own personal family trees, while building and collaborating on a singular worldwide family tree within the same system.

- Founded in 2008 by Chris Whitten
- Mission: To **connect the human family on one tree** that's free and accessible to everyone
- Designed to balance privacy and collaboration so that living people can connect on one world tree to common ancestors

-
- Privately collaborate with close family members on modern family history and recent connections
 - Publicly collaborate on deep ancestors between distant (or close) cousins who are serious about genealogical research and careful about sources
 - Because all the profiles are connected on the same system our collaboration is creating a *single family tree* that will eventually connect us all and make it free and easy for anyone to discover their roots
 - No "premium" memberships and nobody is charged for access to anything - Ever.
 - Those who actively help grow the tree *must* agree with the mission and the WikiTree Honour Code
-

Our Honor Code

The Code is a pledge that community members make to each other. The Creators and Hosts of WikiTree have also made a pledge to keep WikiTree free.

Nine points:

1. Collaborate
2. Accuracy
3. Assume mistakes are unintentional
4. Courteous to everyone
5. Privacy
6. Copyrights
7. Credit
8. Sources
9. Keep info as free and open as possible
